

- 2 (a) Water in a glass bottle exerts a pressure on the glass.

Which of these shows the correct directions of the pressure exerted by the water on the glass?

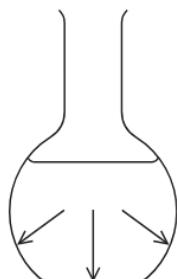

(1)

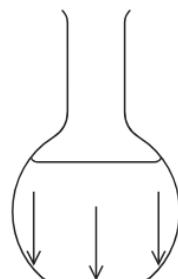

A

B

C

D

- (b) A box weighs 300 N.

The box rests on the floor.

The area of the box in contact with the floor is  $0.75 \text{ m}^2$ .

- (i) Calculate the pressure exerted by the box on the floor.

Use the equation

$$\text{pressure} = \frac{\text{force}}{\text{area}}$$

(2)

pressure = ..... Pa

(ii) Which of these is a unit of pressure?

(1)

- A**  $\text{kg/m}^2$
- B**  $\text{kg m}^2$
- C**  $\text{N/m}^2$
- D**  $\text{N m}^2$

(c) A swimming pool contains fresh water.

The pressure 2m below the surface of the swimming pool is measured.

The pressure 10m below the surface of the sea is also measured.

The pressure 10m below the surface of the sea is greater than the pressure 2m below the surface of the swimming pool.

State **two** reasons why the pressure is greater 10m below the surface of the sea.

(2)

1.....

.....

2.....

.....
