# **Mark Scheme (Results)**

Pearson Edexcel

Additional Sample Assessment Materials  
GCSE 9-1  
Paper 2: Physics 1PH0/2H

First examination 2018

**edexcel** The edexcel logo features the brand name in a dark blue sans-serif font, followed by a graphic element consisting of a 2x3 grid of light blue squares.

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at [www.edexcel.com](http://www.edexcel.com) or [www.btec.co.uk](http://www.btec.co.uk). Alternatively, you can get in touch with us using the details on our contact us page at [www.edexcel.com/contactus](http://www.edexcel.com/contactus).

## **Pearson: helping people progress, everywhere**

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

Summer 2018

## **General Marking Guidance**

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

## 1PH0\_2PH – Physics Mark Scheme

| Question number | Answer  | Mark |
|-----------------|---|------|
| 1 (a)(i)        | An explanation that combines identification –knowledge and reasoning / justification <ul style="list-style-type: none"> <li>• (particles / atoms / molecules) {hit / collide with} piston (1)</li> <li>• causing a force (on the piston) (1)</li> </ul> | (2)  |

| Question number | Answer   | Mark |
|-----------------|--|------|
| 1(a)(ii)        | An explanation that combines identification – knowledge and reasoning / justification <ul style="list-style-type: none"> <li>• volume decrease makes the density of particles increase / more crowded idea (1)</li> <li>• increasing the <b>rate</b> at which particles collide (with the piston) (1)</li> </ul> | (2)  |

| Question number | Answer  | Additional guidance   | Mark |
|-----------------|---|---|------|
| 1(a)(iii)       | Rearrangement (1)<br>$P_2 = \frac{P_1 V_1}{V_2}$<br><br>substitution (1)<br>$P_2 = \frac{103 \times 0.010}{0.0070}$<br><br>evaluation <b>to 2 sf</b> (1)<br>$= 150 \text{ (kPa)}$ | 147 (kPa)<br><br>$1.5 \times 10^2 \text{ kPa or } 1.5 \times 10^5 \text{ Pa}$<br><br><b>rearrangement and substitution in either order</b><br><br>award full marks for correct answer without working | (3)  |

**(Total for Question 1 = 7 marks)**

| <b>Question number</b> | <b>Answer</b>  | <b>Additional guidance</b>                                 | <b>Mark</b> |
|------------------------|--|--|-------------|
| <b>2 (a)</b>           | An answer that combines the following points of understanding to provide a logical description:<br><br>named force (acting at a distance) (1)<br><br>situation (1) | e.g.<br>magnetic<br><br>force between two (magnetic) poles | <b>(2)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Additional guidance</b>  | <b>Mark</b> |
|------------------------|--|---|-------------|
| <b>2 (b)(i)</b>        | rearrangement of<br>work = force × distance<br>to give distance = work ÷ force<br>(1)<br><br>substitution and evaluation (1)<br>18 (m) | seeing $2700 \div 150$<br><br>Award full marks for correct answer without working | <b>(2)</b>  |

| <b>Question number</b> | <b>Answer</b> | <b>Mark</b> |
|------------------------|---------------|-------------|
| <b>2 (b)(ii)</b>       | 2700 (J)      | <b>(1)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>   | <b>Mark</b> |
|------------------------|---|--|-------------|
| <b>2 (b)(iii)</b>      | rearrangement of<br>$KE = \frac{1}{2} mv^2$<br><br>$v = \sqrt{(2 \times KE \div m)}$ (1)<br><br>substitution and evaluation (1)<br><br>19 (m/s) | $v = \sqrt{(2 \times 2700 \div 15)}$<br>$v^2 = (2 \times 2700 \div 15)$<br><br>allow answers that round to 19<br><br>award full marks for correct answer without working<br><br>allow alternative route using $v^2 - u^2 = 2ax$ for full marks | <b>(2)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>       | <b>Mark</b> |
|------------------------|---|----------------------------------|-------------|
| <b>2 (c)</b>           | An answer that combines points of interpretation/evaluation to provide a logical description:<br><br>efficiency increases (at first) (1)<br><br>to maximum efficiency (for mass of about 25 kg) (1) | e.g. decreases for larger masses | <b>(2)</b>  |

**(Total for Question 2= 9 marks)**

| <b>Question number</b> | <b>Answer</b>  | <b>Additional guidance</b>  | <b>Mark</b> |
|------------------------|--|---|-------------|
| <b>3 (a)</b>           | <p>substitution into <math>P = V \times I</math><br/>(1)</p> <p><math>2600 = 230 \times I</math></p> <p>rearrangement (1)</p> <p><math>I = P \div V</math></p> <p>evaluation (1)</p> <p>11 (A)</p> | <p>Substitution and re-arrangement in either order</p> <p><math>I = 2600 \div 230</math> for 2 marks</p> <p>allow answers that round to 11</p> <p>award full marks for correct answer without working</p> <p>allow <math>I = 2.6 \div 230</math> for 1 mark</p> <p>allow 0.011 (A) for 2 marks max</p> <p>if no other marks scored, award 1 mark for <math>2.6 \text{ kW} = 2600 \text{ W}</math></p> | <b>(3)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Mark</b> |
|------------------------|--|-------------|
| <b>3 (b)(i)</b>        | either<br>$\text{power} = (\text{current})^2 \times \text{resistance}$ OR $P = I^2 \times R$ | <b>(1)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>  | <b>Mark</b> |
|------------------------|---|---|-------------|
| <b>3 (b)(ii)</b>       | <p>substitution into <math>P = I^2 \times R</math><br/>(1)</p> <p><math>55 = 4.4^2 \times R</math></p> <p>rearrangement (1)</p> <p><math>R = P \div I^2</math></p> <p>evaluation (1)</p> <p><math>2.8 (\Omega)</math></p> | <p>Substitution and re-arrangement in either order</p> <p><math>R = 55 \div 4.4^2</math> for 2 marks</p> <p>allow answers that round to 2.8</p> <p>award full marks for correct answer without working</p> <p>allow alternative route<br/><math>V = P \div I = 55 \div 4.4</math></p> <p>then <math>R = V \div I = 12.5 \div 4.4</math></p> | <b>(3)</b>  |

**(Total for Question 3= 7 marks)**

| Question number | Answer   | Mark     |          |     |
|-----------------|--|----------|----------|-----|
| 4 (a)           | B<br><table border="1" style="display: inline-table; vertical-align: middle;"> <tr> <td style="text-align: center;">negative</td> <td style="text-align: center;">positive</td> </tr> </table> | negative | positive | (1) |
| negative        | positive   |          |          |     |

| Question number | Answer   | Additional guidance   | Mark |
|-----------------|--|---|------|
| 4 (b)(i)        | An explanation that combines identification - understanding (1 mark) and reasoning - understanding (1 mark):<br><br>charges move (1)<br><br>because of <b>friction</b> (1) | (negative)<br>electrons<br>transfer<br>glass loses<br>electrons | (2)  |

| Question number | Answer   | Mark |
|-----------------|--|------|
| 4 (b)(ii)       | An explanation that combines identification - understanding (1 mark) and reasoning - understanding (1 mark):<br><br>(negative) electrons are rubbed off the glass (on to the silk) (1)<br><br>giving the silk a <u>negative</u> charge (1) | (2)  |

| <b>Question number</b> | <b>Answer</b>  | <b>Additional guidance</b>  | <b>Mark</b> |
|------------------------|--|---|-------------|
| <b>4 (c)( i)</b>       | An answer that combines the following points of understanding to provide a logical description:<br><br>the situation which caused the charge separation (1)<br><br>where the spark travelled {from/to} (1) | examples:<br>when refuelling, spark between end of {fuel/pipe} and vehicle =2<br>spark {between/from /to} person comb/clothes/metal handle and,<br>when combing hair/removing clothing/opening door = 2<br>lightning flash, between cloud and cloud/plane/ground, =2<br>ignore between plug and socket/jump leads | <b>(2)</b>  |

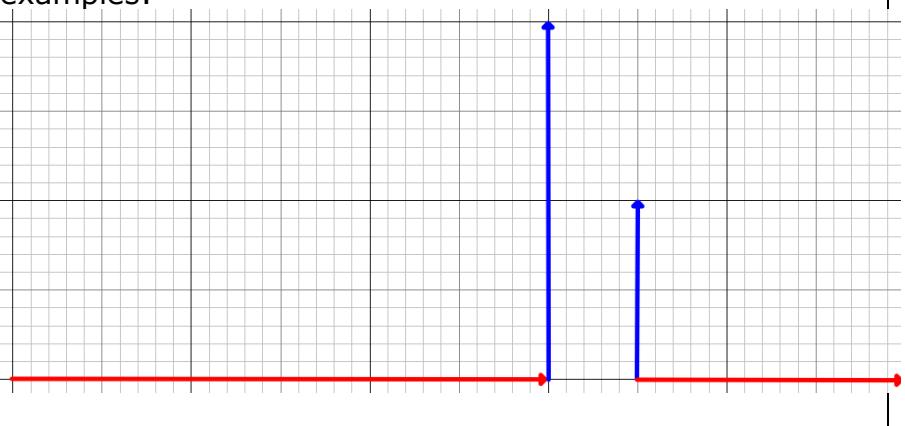

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>   | <b>Mark</b> |
|------------------------|---|--|-------------|
| <b>4 (c)(ii)</b>       | unit conversion (1)<br><br>$0.22 \mu\text{C} = 0.22 \times 10^{-6} \text{ C}$ and<br>$2 \text{ ms} = 2 \times 10^{-3} \text{ s}$<br><br>substitution (1)<br>$0.22 \times 10^{-6} = \text{current} \times 2 \times 10^{-3} \text{ s}$<br><br>rearrangement (1)<br>$\text{current} = 0.22 \times 10^{-6} / 2 \times 10^{-3}$<br><br>evaluation (1)<br>$1.1 \times 10^{-4} (\text{A})$ | substitution and re-arrangement in either order both needed<br><br>award full marks for correct answer without working<br><br>power of ten error only loses one mark, if the rest is correct | <b>(4)</b>  |

**(Total for Question 4 = 11 marks)**

| <b>Question number</b> | <b>Answer</b>   | <b>Mark</b> |
|------------------------|---|-------------|
| <b>5(a)</b>            | An answer that combines points of interpretation/evaluation to provide a logical description:<br>Use of lubrication / oil (1)<br>To reduce friction (between parts) (1) | <b>(2)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Mark</b> |
|------------------------|---|-------------|
| <b>5(b)</b>            | C a javelin moves through the air after leaving an athlete's hand | <b>(1)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Mark</b> |
|------------------------|---|-------------|
| <b>5(c)</b>            | An explanation identifying the fact that the forces shown are acting on two different bodies / they are not acting on the same body (1) | <b>(1)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Mark</b> |
|------------------------|--|-------------|
| <b>5(d)(i)</b>         | <ul style="list-style-type: none"> <li>• two vector arrows at right angles representing the forces (1)</li> <li>• two vector arrows in proportion (1)</li> </ul> <p>examples:</p>  | <b>(2)</b>  |

| Question number | Answer  | Additional guidance                                       | Mark |
|-----------------|---|---|------|
| 5(d)(ii)        | <ul style="list-style-type: none"> <li>• drawing shows a completed triangle or parallelogram (1)</li> </ul> <p>• Evaluation 3.6 N (1)</p> | $\pm 0.2$ N<br>may be calculated using Pythagoras theorem | (2)  |

| Question number | Answer  | Additional guidance   | Mark |
|-----------------|---|---|------|
| 5(e)            | <ul style="list-style-type: none"> <li>• An arrow showing the 'normal contact force' - from between the two surfaces, acting upwards (1)</li> <li>• An arrow showing the 'friction' force – from between the two surfaces (1)</li> <li>• Both forces in the correct directions, as shown (1)</li> </ul> | <p>generally upwards / away from the surface</p> <p>can be to the left or to the right</p> <p>they do not need to start from the same point</p> | (3)  |

(Total for Question 5 = 11 marks)

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>   | <b>Mark</b> |
|------------------------|---|--|-------------|
| <b>6(a)(i)</b>         | <p>Substitution:<br/>           Density = mass/ volume (1)<br/> <math>= 28 \times 10^{-3} / 3.6 \times 10^{-6}</math> (1)</p> <p>Evaluation = <math>7777 \text{ kg} / \text{m}^3</math> (1)</p> | <p>(recalled / used)<br/>           ignore any power of ten<br/>           (pot) error here</p> <p>do not penalise any sf errors</p> <p>(7.77 etc. would get 2 marks: losing the pot mark in the evaluation)</p> | <b>(3)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>                       | <b>Mark</b> |
|------------------------|---|--|-------------|
| <b>6(a) (ii)</b>       | <p>(Use <math>\Delta Q = m \times c \times \Delta\theta</math>)<br/>           substitution<br/>           thermal energy gained = <math>0.028 \times 510 \times 80</math> (1)</p> <p>evaluation = 1100 (J) (1)</p> | <p>ignore any pot error here</p> <p>1142 (J)</p> | <b>(2)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Mark</b> |
|------------------------|---|-------------|
| <b>6a(iii)</b>         | <p>An explanation that combines identification – knowledge (2 marks) and reasoning / justification (1 mark)</p> <p>Solid state <math>\rightarrow</math> particles vibrate (1)<br/> <math>\rightarrow</math> about fixed positions (1)</p> <p>Liquid state <math>\rightarrow</math> particles move randomly / freely (1)</p> | <b>(3)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>                      | <b>Mark</b> |
|------------------------|---|---|-------------|
| <b>6b</b>              | <p>An answer that combines <b>any four</b> of the following points of understanding to provide a logical description:</p> <ul style="list-style-type: none"> <li>• chooses either thermocouple or infra-red thermometer (1)</li> <li>• molten steel is poured into a crucible (1)</li> <li>• a stopwatch is started (1)</li> <li>• the crucible + contents are allowed to cool down (in the room) (1)</li> <li>• temperatures are taken at regular intervals (e.g. every minute) (1)</li> </ul> | any interval with steel – every 10 minutes etc. | <b>(4)</b>  |

**(Total for Question 6 = 12 marks)**

| <b>Question number</b> | <b>Answer</b>   | <b>Mark</b> |
|------------------------|---|-------------|
| <b>7(a)</b>            | <p>variable resistor symbol<br/>power supply or<br/>ammeter with correct symbol, in series with the lamp (1)<br/>voltmeter with correct symbol, in parallel with the lamp (1)<br/>valid method of changing the potential difference (1)</p> | <b>(3)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Mark</b> |
|------------------------|--|-------------|
| <b>7(b)</b>            | P (ohmic) resistor/wire (1)<br>Q (filament) lamp (1)<br>R (semiconducting) diode (1) | <b>(3)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Mark</b> |
|------------------------|--|-------------|
| <b>7(c)</b>            | <p>An answer that makes reference to:<br/>Identification – knowledge (1 mark)<br/>and reasoning / justification – knowledge (2 marks)</p> <ul style="list-style-type: none"> <li>• to begin with (there is) no current as V increases,<br/>then, after a certain voltage, the current rises</li> <li>• sharply / with an increasing gradient</li> <li>• associated with a decreasing resistance</li> </ul> | <b>(3)</b>  |

**(Total for Question 7 = 9 marks)**

| <b>Question number</b> | <b>Answer</b>         | <b>Mark</b> |
|------------------------|-----------------------|-------------|
| <b>8(a)</b>            | <b>D</b> a microphone | <b>(1)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Mark</b> |
|------------------------|--|-------------|
| <b>8(b)</b>            | <b>B</b> keep the magnet still and move the coil to the left | <b>(1)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Additional guidance</b>   | <b>Mark</b> |
|------------------------|--|--|-------------|
| <b>8(c)(i)</b>         | <p>An explanation that combines identification via a judgment to reach a conclusion, via reasoning to include</p> <ul style="list-style-type: none"> <li>• the peaks get higher (1)</li> <li>• because (faster means) greater rate of change of magnetic field (1)</li> <br/> <li>• the width of the peaks gets less (1)</li> <li>• because (faster means) shorter times for magnet to travel through (coils) (1)</li> </ul> | <p>greater induced emf / voltage</p> <p>width of each wave gets less</p> | <b>(4)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Additional guidance</b>   | <b>Mark</b> |
|------------------------|--|--|-------------|
| <b>8(c)(ii)</b>        | <p>An explanation that combines identification, via a judgment, to reach a conclusion, via reasoning, linking one from:</p> <ul style="list-style-type: none"> <li>• time involved is very short (1)</li> <li>• 500 ms (0.5 s) shown on graph (1)</li> </ul> <p>with one from</p> <ul style="list-style-type: none"> <li>• the meter could not respond quickly enough (1)</li> <li>• human/person could not take/record the readings quickly enough (1)</li> </ul> | <p>data loggers can take (lots of) readings quickly</p> <p>human reaction times insufficient</p> | <b>(2)</b>  |

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>                          | <b>Mark</b> |
|------------------------|---|---|-------------|
| <b>8(d)</b>            | use of $\frac{V_p}{V_s} = \frac{N_p}{N_s}$ (1)<br>transformation and evaluation (1)<br>( $N_s =$ ) 25 | award full marks for correct answer without working | <b>(2)</b>  |

**(Total for Question 8 = 10 marks)**

| <b>Question number</b> | <b>Answer</b>  | <b>Additional guidance</b> | <b>Mark</b> |
|------------------------|--|----------------------------|-------------|
| <b>9(a)(i)</b>         | <p>Recall <math>GPE = m \times g \times \Delta h</math> (1)</p> <p>Substitution = <math>400 \times 9.8 \times 1.5</math> (1)</p> <p>Evaluation = 5900 (J) (1)<br/>(which is nearly 6000 J)</p> | accept 5880 (J)            | <b>(3)</b>  |

| <b>Question number</b> | <b>Answer</b>  | <b>Additional guidance</b>   | <b>Mark</b> |
|------------------------|--|--|-------------|
| <b>9(a)(ii)</b>        | <p>An explanation that combines identification – knowledge (1 mark) and reasoning (1 mark)</p> <ul style="list-style-type: none"> <li>• energy is dissipated/scattered (1)</li> <li>• into the surroundings (1)</li> </ul> | <p>energy from a loss of ball's PE / its gain in KE</p> <p>ends up as (kinetic) energy of molecules (of ball / wall / air)</p> | <b>(2)</b>  |

| <b>Question number</b> | <b>Answer</b>     | <b>Mark</b> |
|------------------------|-------------------|-------------|
| <b>9(a)(iii)</b>       | <b>B</b> velocity | <b>(1)</b>  |

| <b>Question number</b> | <b>Indicative content</b>   | <b>Mark</b> |
|------------------------|---|-------------|
| <b>9(b)</b>            | <p>Answers will be credited according to the candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme.</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of the material which is indicated as relevant. Additional content included in the response must be scientific and relevant.</p> <p style="text-align: center;"><b>A03 (6 marks)</b></p> <ul style="list-style-type: none"> <li>• the varying height shows a varying gravitational potential energy(gpe) during the swings</li> <li>• when the height is a maximum the gpe is a maximum-at top of swing</li> <li>• when the height is a minimum the gpe is a minimum-at bottom of swing</li> <li>• kinetic energy varies during swing</li> <li>• kinetic energy maximum at bottom of swing</li> <li>• kinetic energy minimum at top of swing</li> <li>• (continuous) interchange of KE and gpe</li> <li>• total amount of energy is constant during one swing</li> <li>• over a number of swings max KE and max PE decreases</li> <li>• energy is dissipated/'lost' to surroundings</li> <li>• because of air resistance / friction</li> <li>• amplitude/size of swings decrease ( as energy 'lost' to surroundings)</li> </ul> <p>ignore references to momentum</p> | <b>(6)</b>  |

| <b>Level</b> | <b>Mark</b> | <b>Descriptor</b>  |
|--------------|-------------|--|
|              | 0           | <ul style="list-style-type: none"> <li>• No rewardable material.</li> </ul>  |
| Level 1      | 1-2         | <ul style="list-style-type: none"> <li>• Deconstructs scientific information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding.</li> <li>• Judgements are supported by limited evidence. (AO3)</li> </ul>  |
| Level 2      | 3-4         | <ul style="list-style-type: none"> <li>• Deconstructs scientific information and provides some logical connections between scientific concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently.</li> <li>• Judgements are supported by evidence occasionally. (AO3)</li> </ul> |
| Level 3      | 5-6         | <ul style="list-style-type: none"> <li>• Deconstructs scientific information and provide logical connections between scientific concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently.</li> <li>• Judgements are supported by evidence throughout. (AO3)</li> </ul>          |

**(Total for Question 9 = 12 marks)**

| <b>Question number</b> | <b>Answer</b>   | <b>Additional guidance</b>                                  | <b>Mark</b> |
